

HOW TO TRAVEL Through the I-215/University Parkway Diverging Diamond Interchange

- This design helps improve safety and keep traffic moving more smoothly through the interchange.
- Clear signs, signals, and pavement arrows guide each movement.
- Pedestrian access will remain the same during this phase of the project.

- Approaching the interchange, choose your direction using overhead signs and lane arrows. Stay **RIGHT** to get onto I-215 North.
- Continue **STRAIGHT** to get onto I-215 South or University Parkway.

- If you continue straight, you will come to a signal.
- As you move through the interchange, you will be briefly guided to the other side of the roadway.
- Watch for signs, pavement arrows, and traffic signals guiding you forward.
- Concrete dividers help guide you through the interchange and keep you safely in your lane.

- Once on the other side, follow lane arrows:
 - o Stay **LEFT** to get onto I-215 South.
 - o Stay **RIGHT** to continue along University Parkway.

- At the next signal, traffic shifts back to the original side of the street.
- Follow the signs and arrows as you continue along your route.
