Invitation to Industry Briefing

The San Bernardino County Transportation Authority (SBCTA) invites interested parties to attend an upcoming industry briefing on the planned underground transit connection between Ontario International Airport (ONT) and Cucamonga Station. The progressive design-build contract will include a transitional operating period of at least one year before handing over the system to Omnitrans, who will be the operating agency.

The project is a 4.2-mile-long underground system with three stations—two stations at ONT and one at Cucamonga Station. The system will be operated using zero-emission, rubber-tire, automated transit network (ATN) vehicles capable of providing on-demand service and accommodating level boarding and luggage. The contracting team is to deliver the underground infrastructure, stations and ATN vehicles.

The briefing will inform industry of the:

- scope of the project
- status of design development
- anticipated design-build team participants
- procurement goals
- schedule for upcoming solicitation and project delivery

For those interested in attending this on-line (Zoom) presentation, forward your email address to: smorris@gosbcta.com. The presentation is scheduled for Monday, July 25th, 2022 at 10:00 AM PDT.

Following the industry briefing, SBCTA will conduct one-on-one meetings with potential proposers. Meeting times will be available on July 25th and 27th. Invitations for the one-on-one meetings may be limited to parties representing lead general contractors, lead tunneling contractors and vehicle technology providers. Please submit your requests for a one-on-one meeting no later than Friday, July 22nd to smorris@gosbcta.com.

This will be a transformative, first-of-kind project and we trust you will be as excited as we are about the opportunities this project offers.

Respectfully,

Shaneka Morris
