**Grant Opportunities and Forecast**  
**March 12, 2025**

*(**NEW!** is noted for grants added in the past 14 days)*

Grant opportunities that may be of interest to SBCOG begin on the next page.

**Table 1** includes a list of new grant opportunities since the last grant table.

**Table 2** includes open grant opportunities. The “Success Rate” for each opportunity (if known) is indicated in **blue** in the “Notes” column. This is based on the number of applications awarded in relation to the number of applications submitted. The table also includes a link to past grant awards, if available. Additionally, we have included the anticipated level of difficulty to develop each grant proposal. A key is provided below for reference:

Key: Level of Difficulty (LOD)	
<b>Simple</b>	A simple level of difficulty indicates an application that may take 8 hours or less to develop and can likely be accomplished “in-house” with minimal effort/allocation of internal resources.
<b>Medium</b>	A medium level of difficulty indicates an application process that will take a more substantial allocation of internal resources to accomplish and might possibly require outside assistance (20-70 hours to develop application).
<b>Complex</b>	A complex level of difficulty indicates a VERY competitive opportunity, with a small success rate and intensive grant-development and positioning.

71	<b>PAUSED:</b>  Ongoing  Brownfields	<b>Targeted Brownfields Assessment Technical Assistance Program.</b> To conduct Phase I Environmental Site Assessment (ESA) and/or Phase II ESA which documents environmental conditions at a property under consideration for redevelopment. The TBA can also be used to evaluate various cleanup alternatives, costs, and reuse planning. EPA's environmental consultants will conduct the TBA. Communities participating in a TBA will receive a written report detailing the findings of Phase I or Phase II ESA. The reports are intended to help meet due diligence requirements of real estate transfer, and to identify environmental impediments to redevelopment. A Phase I ESA includes background and historical investigations, a site/area walkthrough inspection, inter views with landowners and neighbors, and a written report. A Phase II ESA includes sampling to identify the types, concentrations, and areas of potential contamination. Cleanup options along with cost estimates and other technical reports.
