**Grant Opportunities and Forecast**
**February 25, 2026**
*(**NEW!** is noted for grants added in the past 14 days)*

Grant opportunities that may be of interest to SBCOG begin on the next page.

**Table 1** includes a list of new grant opportunities since the last grant table.

**Table 2** includes open grant opportunities. The "Success Rate" for each opportunity (if known) is indicated in **blue** in the "Notes" column. This is based on the number of applications awarded in relation to the number of applications submitted. The table also includes a link to past grant awards, if available. Additionally, we have included the anticipated level of difficulty to develop each grant proposal. A key is provided below for reference:

| Key: Level of Difficulty (LOD) | |
|---|---|
| **Simple** | A simple level of difficulty indicates an application that may take 8 hours or less to develop and can likely be accomplished "in-house" with minimal effort/allocation of internal resources. |
| **Medium** | A medium level of difficulty indicates an application process that will take a more substantial allocation of internal resources to accomplish and might possibly require outside assistance (20-70 hours to develop application). |
| **Complex** | A complex level of difficulty indicates a VERY competitive opportunity, with a small success rate and intensive grant-development and positioning. |
