

LISTENING. PLANNING. CONNECTING.

OVERVIEW

The 360° for 960 Implementation Plan is a countywide Planning study led by the San Bernardino County Transportation Authority (SBCTA) in coordination with Caltrans to identify Complete Streets improvements along the State Highway System (SHS) throughout San Bernardino County. The study is a direct regional response to Senate Bill 960 (SB 960) which mandates the incorporation of complete streets and transit-priority features into state highway projects. Working together with residents, local agencies, community organizations, transit providers, and Caltrans, the study will evaluate high-priority transportation barriers and develop Complete Streets recommendations that will improve safety, accessibility, and connectivity for people walking, biking, taking transit, and driving. These recommendations, and a transparent process for implementation, will guide future Complete Streets project opportunities on the SHS.

WHAT ARE COMPLETE STREETS?

Complete Streets are roadways designed to allow motorists, pedestrians, cyclists, transit riders, and people of all ages and abilities to move safely along and across. The intent is not to add every mode to every road, but to ensure that each road appropriately serves the people and uses it is built for.

STUDY BENEFITS

- Safer and more convenient access to schools, businesses, transit stops, neighborhoods, and other community destinations.
- One coordinated, countywide set of Complete Streets priorities along the SHS, rather than piecemeal efforts.
- A pipeline of improvements, so the region can act quickly when highway projects and funding opportunities come up.
- A stronger position for SBCTA, Caltrans, and local agencies to prioritize investments and compete for state and federal funding.
- Public accountability, with clear targets and progress reported over the next 4, 8, and 12 years, so everyone can see what is being delivered.

STUDY ACTIVITIES

- Evaluate existing conditions along the SHS, including walking, biking, transit, and roadway connections.
- Identify priority transportation needs, barriers, and opportunities to improve safety, accessibility, and mobility along the SHS.
- Gather input from residents, local agencies, community organizations, transit providers, and other stakeholders.
- Develop Complete Streets recommendations to inform future opportunities.
- Share what the study finds through the project website, so the public can follow progress.

FUNDING

The 360° for 960 Implementation Plan is funded by Caltrans and administered by SBCTA to support implementation of SB 960.

Funding supports development of the Planning study, technical analysis, and community engagement activities, but does not represent approved or funded construction projects. In other words, this study identifies and prioritizes needs. Decisions about which improvements will move forward, and when, will be made later through Caltrans and local agency project development and funding processes.

APPROACH

We Listen.

The 360° for 960 Implementation Plan gathers community input to identify opportunities to improve walking, biking, and transit connections along the SHS in San Bernardino County.

We Plan.

The study combines community feedback with technical analysis to identify Complete Streets recommendations that improve safety, accessibility, and connectivity along the SHS while supporting future project development and funding opportunities.

You Move.

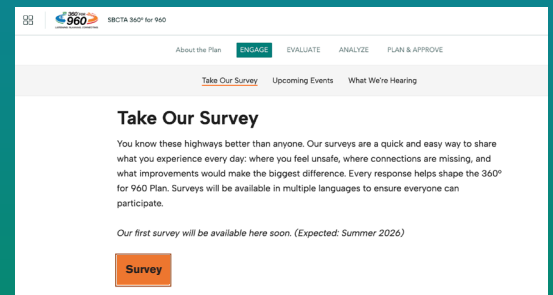

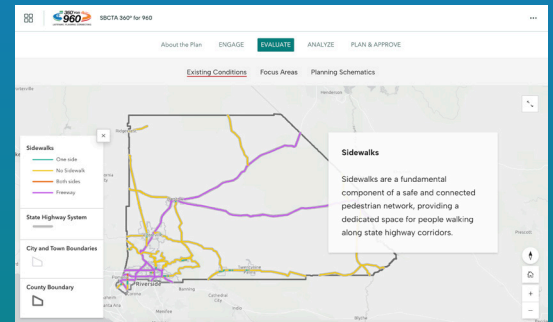

The final Plan will help guide future transportation investments that improve safety, accessibility, and connectivity for all users along and across the SHS in San Bernardino County.
